

Webstercare®

Portion-pak® Trolley

Product Information

Portion-pak trolleys are designed for aged care staff to store, carry and administer Portion-pak doses during medication rounds.

The trolley features three slim drawers that fit two storage trays in each, or three administration trays, and one large drawer which is ideal for PRN medications, liquids and other non-packed items.

All drawers can be locked when the trolley is not in use, ensuring safe storage of medications at all times.

The extra storage space offered by the Portion-pak trolley enables faster medication rounds, without the need to go back and replenish medications.

"Innovative solutions to medication management"™

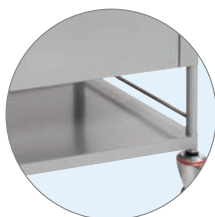

Webstercare®

Completely secure with both a temporary lock for mid round security and a key lock for between round storage.
Easy clean stainless steel surface

Bucket with holder for convenient storage of rubbish on the medication round

Storage tray offers additional storage if required

Red Brake Wheel for safety and control
