PAPERLESS MEDICATION MANAGEMENT

THE AGED CARE SECTOR IS READY TO EMBRACE **FULLY ELECTRONIC PRESCRIBING AND CHARTING** – AIMING TO IMPROVE EFFICIENCIES, REDUCE RISK, AND ENSURE MAXIMUM RESIDENT CARE.

Prescribing | Charting | Signing | Communication

What does Paperless Medication Management look like in Aged Care?

Prescribing, medication charting, and communication will all become fully digital and online – providing a single source of truth for your residents' medication profile. Say goodbye to paperwork, owing scripts, transcribing, duplication of charts, faxing and more!

Want to go PAPERLESS?

Get started by contacting us now on **1800 244 358** or info@webstercare.com.au
Plus sign up for newsletter updates: <https://www.rxmedchart.com.au/electronic-prescribing>

WHY GO PAPERLESS?

Eliminate owing scripts

Streamline processes & communication

Continuity of supply of residents' medication (up to 4 months)

Legal chart as a script - valid PBS script

Save paper, time and money

Maximise resident safety

18th - 24th Nov

ANTIBIOTIC AWARENESS WEEK

Pharmacists are encouraged to stop and reflect on their antimicrobial stewardship.

The frequent use of antimicrobials in residential aged care facilities (RACFs) is of particular concern, as residents are often vulnerable to infections due to their compromised immune status, multiple co-morbidities and poor functional status.

"Urinary tract infections are common conditions in RACFs and have been identified as a significant cause of inappropriate antibiotics prescribing," explains Webstercare's Managing Director Gerard Stevens AM.

With this in mind, **NPS MedicineWise** approached us to work collaboratively to develop a tool that could highlight such prescribing patterns and trigger corrective responses.

The Webstercare/NPS MedicineWise Antibiotics report was created from this collaboration and allows pharmacists to rate their antimicrobial stewardship.

Pharmacies that operate with Webstercare's Medication Management Software (MMS Professional Plus) can analyse resident medication data to help identify patterns of antibiotic use and help prevent antimicrobial resistance.

To find out more, or to view a sample of our reports, contact us at info@webstercare.com.au

ANOTHER CUSTOMER HAPPY WITH THEIR AUTOMATED PACKING

"The robot never makes an error, and always delivers the highest level of safety to the patient."

These are the words spoken by a happy owner who has just installed the MedsPro® Packing Robot in his pharmacy. We spoke with Michael Cunico from Umina Beach YouSave Chemist in NSW who was pleased to share his experience with his new MedsPro Packing Robot 'AI'.

IMPROVED SERVICE, LESS ERRORS

"We service a local Nursing Home and are always looking for better patient care and error reduction. The MedsPro Robot was the next move forward to deliver the best possible service to the nursing home and our community patients."

This technology makes us the leader in our field and ensures we deliver Central Coast residents the highest level of pharmacy service possible."

Sherrie Besley, Mollie Driscoll and Georgia Vowless from Umina Beach YouSave Chemist.

MORE TIME SPENT WITH CUSTOMERS

"The MedsPro Robot has drastically improved our productivity. I worked with the Robot personally and we were doing 38 multipacks an hour!"

This was impossible to do without the Robot.

The increase in productivity ensures we have medications packed on time, every time. The time saved is invested back into the pharmacy and customers, such as checking packs and ensuring medication records are correct.

It has also resulted in lower stress levels for staff members, particularly during times when staff levels are under pressure due to annual leave or unexpected sick leave."

NO REGRETS!

"While the Robot was a large financial investment, it puts us at the leading edge of the pharmacy industry and provides our nursing home and private patients the absolute highest level of care in Australia. It is worth every cent!"

The team at Umina have grown attached to their new packing assistant AI and are loving the improvements in productivity he has brought to their pharmacy. For more information on how you can streamline your packing process contact us on **1800 244 358** or email

5 REASONS YOU'LL LOVE THE MEDSPRO PACKING ROBOT

1 FAST

Reduce your staff packing time.

The MedsPro Packing Robot packs two packs at a time, including: Webster-pak® Multi Dose, Webster-pak® 28, Unit Dose 7® and Portion-pak®.

2 EFFICIENT

Pharmacy staff and packing technicians will reduce their packing time and be able to have more time on the pharmacy floor developing and strengthening customer relationships.

3 SAFE

Verified by scanning barcodes, the Robot always accurately confirms the pack contents of each medication released from the canister into the blister cavity. This ensures maximum accuracy.

4 EASE

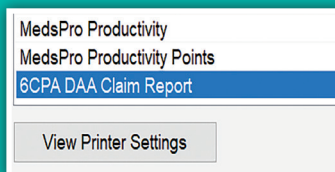

Supports all Webstercare systems, so changing between other existing systems is fast and straight forward.

5 SUPPORT

Hands on support is provided pre- and post-implementation. Taking on a new system can sometimes be tricky so we are here to help you every step of the way!

SOFTWARE HANDY HINT: Generate your 6CPA claim report

1. From the main screen select 'REPORTS'
2. Select 'DATABASE REPORTS'
3. Select '6CPA DAA CLAIM REPORT'
4. Select the facilities to be included in the report
5. Input data range for claim period
6. Select 'PREVIEW'
7. Check the information is correct in the report
8. Select 'EXPORT 6CPA'
9. Select the Save Directory (save as: .CSV format)
10. Select 'OK'

Note: Claims must be submitted before the end of the month that follows your claim period ie. For an October claim, you have till 30th November to submit your claim.
