Introducing Webster-pak iCHECK™

Webstercare MMS™
MEDICATION MANAGEMENT SOFTWARE

New Streamlined Checking System

Webster-pak iCHECK™ will reshape the way you check your medication packs. It saves time and gives you confidence knowing you're checking current and correct information. It's already a feature of your existing MMS software and it comes at no extra charge. All you need to do is select the option and it is ready for you to use.

What is Webster-pak iCHECK™?

Webster-pak iCHECK™ is an interactive tool in your MMS software, which assists you in streamlining your checking process for medication packs. It ensures you have the most up-to-date profile and that it has been accurately packed, alerting you if a change has been made since the header card was printed.

✅ SAFE

- Webster-pak iCHECK™ provides confidence you are checking the latest doctor's order.
- Meets the latest QCPP requirements for documentation with records and reports on pack checking activities.
- Allows for easy capture of exceptional cases where a correction may be required before supply.

✅ FAST

- Streamlines checking for groups or batches of Webster-pak® and Unit Dose 7® patients.

✅ FREE

- Webster-pak iCHECK™ comes at no extra charge with your latest version of MMS software.

Webster-pak iCHECK™
New Streamlined Checking System

How Webster-pak iCHECK™ works

- The header card barcode is scanned.

- A visual medication profile pops up on the screen.

- If the profile is current:
  - you can visually check the contents of each blister displayed on the screen
  - colour images of the medication appear on the screen for cross reference.

- If a medication profile has changed the software will give you a visual and audible alert.

When a medication profile is updated this will create a new barcode for this profile. If a profile has changed since your last print run, when you scan your Webster-pak or Unit Dose 7, you will receive a visual and audible alert.

No need for hard copy profiles

When using Webster-pak iCHECK™ you can do away with the hard copy profile. What you see on the screen is current.

You have complete confidence knowing that what you're checking is accurate, and that you will be alerted if changes have occurred on a profile. It allows you to really be on top of all the changes as they happen and make sure that what you're providing to customers, whether in aged care or the community, is the most current and correct information.

What Pharmacists are saying about Webster-pak iCHECK™

"Our Pharmacists are more confident in ensuring that what they're checking is the most current and correct information."

"In the time it took another pharmacist to check one section, I was able to complete four." (Unit Dose 7)

"It's time saving for sure, but that's not the main benefit for me. It's having confidence in knowing exactly what is in the blister without having to flip the header card back and forth… It just flows a lot better when checking." (Webster-pak Multi Dose)

"Yes it's time saving overall, but I think that's secondary to actually figuring out what's in the pack and checking it with confidence."

Getting Started

1) **Go to MMS Utilities > select Webster-pak iCHECK™** *(currently QA Check)*, or

   Double click the icon on your desktop

2) **Follow the steps in our** *User Guide* **available on our website**
