**MMS  
SPECIAL  
EDITION!**

Discover some of the **KEY FEATURES OF WEBSTERCARE's MMS®** which will help you navigate your daily tasks with ease and discover more time saving opportunities. *The possibilities are endless!*

## 1 MMS Online Help

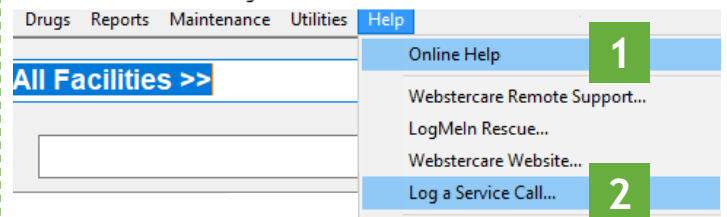

Did you know **MMS** supports you with a multitude of features and tools which ensure the safest possible medication delivery? Here's how to access this invaluable resource.

## 2 Log a Service Call

Webstercare® are always here to support you and there will come a time when you need to **Log a Service Call**. Here's how to contact us for help.

Go to Main Menu → Click Help  
→ Scroll to **Online Help [1]** or **Log a Service Call [2]**

Webstercare Medication Management Software - 56.14.328

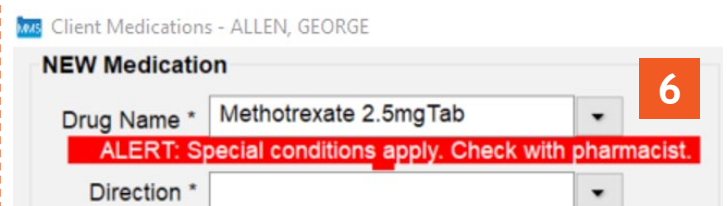

When in Online Help → Click **Video Library [3]**,  
**Event Reminder [4]** or **Brand Override [5]**

MMS Help Menu

When in Online Help → Click Adding and Editing Medications  
When Adding a **High Risk Medication** an **ALERT** will appear [6]

## 3 Video Library

If you haven't already checked out the **Video Library** - STOP EVERYTHING - and check it out now! Showcasing short clips on how to access and use many MMS functions, the library is growing so check in regularly!

## 4 Event Reminder

So much more than just an **Event Reminder**... this feature enables you to:

- Record information on clinical interventions
- Record correspondence from RACFs
- Record out of hours requests
- Add reminders for future events
- Use the calendar tool to add reoccurring reminders eg. Med chart audits, printing special packs etc.
- Events added are included in the MAC Report which is useful when preparing and attending MAC meetings at RACFs.
- Use the **Quick Notes** button from your MMS main screen to quickly record an event and come back to it later.

## 5 Brand Override

Do yourself a big favour and view a short video on how to perform a **Brand Override**. This is a timesaver you won't want to miss... **Just scan & watch how!**

## 6 High Risk Medication Alert

Take note of the **High Risk Medication Alerts** which appear when adding medications, including Warfarin, Cytotoxics, Sifrol, Methotrexate and S8 medications.
