Webstercare® De-Blister Machine

The **NEW** semi-automatic Webstercare De-Blister Machine is designed to improve the efficiency, safety, and consistency of medication removal from packaging.

By combining manual loading with automated, precision-controlled extraction, it enables pharmacists and technicians to remove tablets and capsules from blister packs quickly and reliably, while maintaining product integrity. Ideal for high-volume settings, it reduces repetitive manual handling and staff strain while freeing up time for critical pharmacy tasks and supporting a more streamlined dispensing workflow.

Key features & benefits

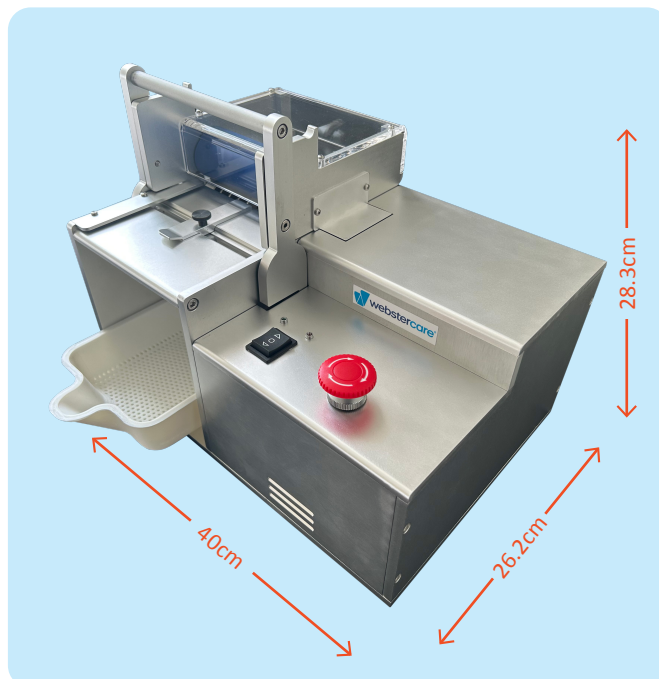

Quick Calibration System (QCS) delivers precise, controlled, and adjustable extraction for fast, consistent de-blistering. This enhances accuracy and repeatability, helping pharmacies streamline workflows, reduce variability between operators, and maintain steady results across a range of medications.

Compatible with multiple blister types, including foil-to-foil and foil-to-plastic formats, offering flexibility across commonly used packaging and reducing the need for multiple tools.

Tested across a wide range of medications, accommodating various tablet and capsule sizes as seen in the [Medication Matrix](#).

Clean, damage-free medication removal with no crushing, chipping, or deformation, preserving medication integrity during extraction.

Durable aluminium body with a stainless steel QCS, designed for a hygienic and easy-to-clean finish. The QCS is easily removable and dishwasher-safe.

Burning questions
